Professional Summary

Senior Front-End Engineer and Architect with 18+ years of experience building enterprise applications, specializing in Angular and TypeScript. Key contributor to TriplePoint UX, the web-based interface for a commodity trading and risk management (CTRM) platform. Experienced in modernizing legacy Delphi applications to Angular. Full-stack experience with Spring Boot, GraphQL, and REST APIs, and strong debugging skills from requirements through production support.

Core Skills

Front-End
Angular, TypeScript, JavaScript, RxJS, HTML5, CSS3, AngularJS

Back-End
Spring Boot, Core Java, GraphQL, REST APIs

Databases
MySQL, MS SQL Server, Oracle (Foundational Knowledge)

Build & DevOps
NPM, Webpack, Maven, Jenkins, CI/CD, Git, GitHub, Bitbucket

Testing
Jasmine, Karma, Selenium, JUnit, Mockito, Postman

Desktop
Delphi

Practices
Agile, Scrum, Kanban

Also familiar with
AWS, Power BI

Professional Experience

Senior Software Architect 02/2008 – 06/2026
TriplePoint Technology Pune, India
Commodity trading and risk management (CTRM) software

- Key contributor to the architecture, design, and development of TriplePoint UX, the web-based front end for the TriplePoint CTRM platform, built with Angular and TypeScript.
- Migrated few modules of QMastor, a CTRM application, from Silverlight to Angular 15, replacing an end-of-life technology with a modern web stack.
- Contributed to the transition of the TriplePoint Delphi desktop application to a modern Angular web interface.
- Designed reusable front-end architecture, including shared components, a feature-module structure, and common services for data access, to keep screens consistent and speed up development.
- Built Spring Boot REST and GraphQL services behind the UI, working on the contract between front end and back end.
- Improved application performance using lazy-loaded modules and optimized change detection, keeping data-heavy trading screens responsive.

- Wrote unit and end-to-end tests with Jasmine, Karma, and Selenium, and used JUnit and Mockito on the Java side.
- Resolved complex production issues through debugging and root-cause analysis, supporting live trading users.
- Maintained build and delivery pipelines using Maven, Webpack, and Jenkins.

Earlier Experience

Software Engineer 10/2006 – 01/2008
Ness Technologies India Pvt. Ltd. Mumbai

- Developed Delphi-based components for Retalix, a point-of-sale (POS) application.
- Supported maintenance, defect fixing, deployment, and troubleshooting.

Software Developer 10/2004 – 09/2006
MicroWorld Software Services Pvt. Ltd. Mumbai

Developed and maintained modules for eConceal, firewall software, contributing to development, testing, debugging, and issue resolution.

Key Products (TriplePoint Technology)

- TriplePoint UX / CTRM: Web-based interface for a commodity trading and risk management platform (Angular, TypeScript, Spring Boot, REST, GraphQL).
- QMastor (CTRM): Migrated from Silverlight to Angular 15.
- Foundation: In-house application development framework; key contributor to design and development.
- TestPilot: Load testing and performance measurement tool; owned and developed in Delphi.
- TriplePoint Legacy Desktop Application: Designed and developed in Delphi.

Education

Master of Computer Applications (M.C.A.) 2005
Institute of Management & Entrepreneurship Development, Pune

B.Sc., Mathematics 2002
Vivekanand College, Kolhapur
